

Environmental Policy

(Revision 1)

Virtue Aerospace Limited provides its customers with high quality precision machined products using advanced manufacturing technology which meet or exceed customer requirements and expectations that are both safe and conforming and delivered in a timely manner.

We are committed to the care of the environment and the prevention of pollution. We acknowledge that it is our responsibility to ensure that all aspects of our operations are carried out in such a way that they will have the minimum adverse effect on the environment, and that we remain committed to fulfilling our compliance obligations.

This policy provides the framework for periodically setting and reviewing objectives as part of the company's commitment to continually improve and enhance its environmental performance.

In line with these principles Virtue Aerospace Limited will: -

- Maintain an Environmental Management System in accordance with the latest revision of BS EN ISO14001.
- Assess all areas of our activities, products, and services with respect to their impact on the environment and incorporate all practicable procedures and controls where necessary in our commitment to prevent environmental damage and pollution.
- Minimise and control the release of environmentally damaging substances to the surrounding area.
- Monitor energy and resource consumption and use this information to improve efficiency.
- Monitor waste production and use this information to reduce, reuse, recycle or eliminate waste materials.

All aspects of this policy will be communicated to employees, along with their individual responsibilities, through appropriate training and awareness, and to shareholders, customers, the public and any other interested parties as appropriate.
